Six Boxes Per Case	@ \$178.00/case

Measure the width of your window and if necessary, trim your Redi Shade to that width.

How do I use Redi Shade for my arch shape windows?

- Measure the midpoint of your arch window base, trim shade to that width
- Peel tape backing and as you face your window, stick the shade onto the left side of the window base
- Open the shade fan-style, and using cellophane tape, tape it to the right side of the frame and then tape shade to top center of window frame.

How do I accurately measure my window?

- The width of your window is the most important. Using a measuring tape, simply measure the inside of your window frame. Mark this width on your Redi Shade and trim to fit. If necessary, you may choose to trim the length of your shade with scissors.
